

EDUARD BENEDIC

London | 07480735866 | benediceduard@outlook.com | Portfolio: <https://eduard-benedic.herokuapp.com/>

Profile

Highly-driven front-end developer with an unorthodox degree in Human Nutrition and a background in biochemical engineering, I have discovered my passion for web development and I am now looking to develop a career into software engineering. Through my ambition and determination, I have quickly assimilated rich knowledge in the software development industry by working in the field as well as assiduously keeping up with the latest trends. Moreover, my curiosity has led me to take up back-end technologies such as Node, MongoDB and I am not planning to slow down. Focused, problem-solving oriented and a great team player, I also possess a good understanding of the importance of SEO.

Hard Skills

Front end skills	Back-end skills	Other technologies

Professional profile

Netrix Ltd – Front-End Developer | 2019 August – 2020 current | London, UK

Main Responsibilities:

- convert design files into HTML, CSS and JavaScript
- Maintaining previously created websites
- HTML emails creation
- Optimizing images through Photoshop
- Understanding clients brief, keeping the customers updated regularly and developing professional manner via email and phone.

Walkers of Whitehall – Bartender 2018 September – 2019 July | London, UK

This temporary position gave me the opportunity to develop excellent social skills and aptitudes. I have also learned how to handle customers complains effectively and with minimal disruption.

Education & Credentials

BSc Human Nutrition – University of Westminster, London | 2017-2020

During my undergraduate period, I have developed analytical skills through the core module Research methods in which I studied statistics and mathematical concepts. Whilst in university, I accidentally came across an HTML book that greatly intrigued me thus paving the way for my web development passion. In 2018, I became certain that web development is the career I want to pursue. This led me to divide my time between coding and finishing my current degree. As a result, I acquired solid time-management skills and resilience.

BSc Biochemical Engineering - Babes-Bloyai University, Romania, Cluj-Napoca | 2015-2017

During this two years I developed a good analytical and problem-solving mind, skills that turned out to be essential in my career as a web developer. During my undergraduate period I have also traveled to the USA two years in a row through the Work and Travel program, where I learned new cultures and I interacted with diverse students from all backgrounds all the while mastering my language skills and the customer-oriented manners of addressing.
